FOREWORD

The Government Printing Office began operations in accordance with Congressional Joint Resolution 25 of June 23, 1860. The act stated that the Superintendent of Public Printing was authorized and directed to have executed the printing and binding authorized by the Senate and House of Representatives, the Executive and Judicial Departments, and the Court of Claims.

The Government Printing Office is part of the Legislative Branch and is under the direction of the Public Printer of the United States. The Public Printer is required by law to be a practical printer versed in the art of bookbinding and is appointed by the President with the advice and consent of the Senate.

The Congressional Joint Committee on Printing acts as a board of directors of this Office. The activities of the Government Printing Office are outlined and defined in the act of October 22, 1968, as amended (82 Stat. 1238; 44 U.S.C.).

The GPO executes orders for printing and binding placed by Congress and Departments and establishments of the Federal Government. It furnishes blank paper, inks and similar supplies to all Government activities on order. It prepares catalogs and distributes and sells Government publications. Over 25,000 different publications are sold through mail orders and government bookstores throughout the United States. It administers the Depository Library Program through which selected government publications are made available in libraries throughout the country.

GPO invites bids from commercial suppliers on a wide variety of printing and binding services. It awards and administers contracts, and maintains liaison between ordering agencies and contractors.

FISCAL YEAR 1975 HIGHLIGHTS

Most facets of printing and binding provided by the Government Printing Office during 1975 were greater than the preceding fiscal year. Total dollar volume aggregated \$439.7 million. This was \$73.6 million, 20 percent, greater than 1974, and \$148 million greater than 1973. The two year growth was 51 percent. Procurement of printing from commercial sources was 66.8 percent of the total dollar volume for 1975 compared with 64 percent in fiscal year 1974.

Modernization efforts during the past year included the installation of an optical character reader/text processing system which was initially used to produce congressional work. The system provides the capabilities for copy editing, updating, and data retrieval from storage through the use of special purpose video display terminals. It is anticipated that a 20 percent cost reduction will result from hearings produced with this system. Six new offset presses, replacing obsolete equipment, were placed in operation during the year. Many congressional publications have been converted to the adhesive binder which was installed last year resulting in lower cost and a better product. An automatic gathering, sewing, and folding machine, used to manufacture U.S. passports, was also placed in operation during 1975.

The Environmental Impact Study for a proposed new main printing facility was initiated and is expected to be completed early in fiscal year 1976.

Several new management methods and processes have been initiated or greatly refined during this year. Those expected to have major impact are:

- Management by Objective which was formally adopted throughout the Office in August 1974 to define, systematically plan, measure progress and meet objectives at all organizational levels.
- Automated data services planning for which new policies and procedures were introduced to develop orderly and workable selection, approval and implementation of major computer oriented projects.
- Internal budgeting, work measurement and productivity standards development were refined and strengthened to further coordinate and integrate resources with workload.

A pilot project on the use of microfilm was begun. It involves conversion of the Code of Federal Regulations from hard copy to microfilm for distribution to selected depository libraries. If this test is successful, the Code will be available to all depository libraries in microfiche. It is expected that this will reduce the cost of the Depository Library Program by \$320,000 annually.

Physical consolidation of certain activities under the Superintendent of Documents has been partially completed and some new automated systems brought on line. These have improved the effectiveness of Documents programs.

THE PUBLIC PRINTER'S PERSPECTIVE

Fiscal year 1976 will see an increase in the amount of composition produced on photocomposition equipment and a continuing decrease in overtime hours in the hot-metal typesetting operations. The text processing capacity of the Electronic Photocomposition Division will more than double in fiscal year 1976 and new phototypesetting equipment will provide increased flexibility. New processes in the platemaking area will become operational which may soon replace our present relief platemaking processes. Purchased printing by the regional field offices is anticipated to increase in volume in fiscal year 1976 as agencies decrease the amount of work produced in-house.

During fiscal year 1976 an Office of Assistant Public Printer for Planning will be established. The principal purpose of this activity will be to determine the appropriate alternatives to insure the agency's mission is accomplished in the most efficient, effective, and economical manner with particular emphasis on utilizing new technology by the Government Printing Office and its customers.

It is expected that sales of government publications to the general public and distribution to the depository libraries will increase. New facilities, new systems and increased productivity will be required to handle these increases. Action in these areas has started and will permit handling of greater volume more efficiently.

STAFF ACTIVITIES

OFFICE OF GENERAL COUNSEL

The General Counsel is the chief legal officer of the Government Printing Office and is responsible for providing legal services primarily in the areas of legislation, procurement, personnel actions, labor-management relations, litigation, and claims.

In discharging this responsibility the Office of the General Counsel (1) provides all legal services relating to the procurement and disposal of all real and personal property, including determination and settlement of disputed procurement and other contracts and claims, (2) drafts and comments on all legislation affecting the Office, (3) investigates torts and claims and approves their disposition, (4) determines the legality of internal instructions, policies and practices, (5) provides hearing examiners for grievances processed under internal Government Printing Office procedures, (6) provides agency representatives for Equal Opportunity complaints, negotiates settlements of Equal Opportunity matters, (7) acts as legal advisor to agency representatives in adverse action appeals and hearings convened by the Civil Service Commission, (8) prepares litigation reports for use by the Department of Justice and the U.S. Attorneys in court cases and otherwise assists therein, (9) furnishes services of attorneys to act on Government Printing Office Contracts Appeals Boards, and (10) reviews and coordinates union contract matters.

		<u>FY 1975</u>	<u>FY 1974</u>	<u>FY 1973</u>
Personnel	Number of Employees	10	9	5
Activities	The amount and complexity of the workload increased over fiscal year 1974 in three areas. The contract disputes and appeals increased from one in fiscal year 1974 to 10 cases in 1975, Equal Opportunity hearings increased from four to nine in 1975 and litigations including class action increased from four in fiscal year 1974 to five in fiscal year 1975.			

During the year Public Law 93-359, dated July 25, 1974 authorized the Government Printing Office to waive certain claims of the United States arising out of erroneous payments of pay and allowances, bringing the Government Printing Office into line with other Federal agencies which already have this statutory authority; and Public Law 93-459, dated October 20, 1974 amended Title 44, United States Code, to provide statutory accountability of certifying officers of the Government Printing Office similar to the accountability of other Government certifying officers and provided that they may submit vouchers to the General Accounting Office for advance rulings.

Cases A precedent-making case worked on during this year involved the liability of the Public Printer and the Superintendent of Documents for money damages for invasion of privacy.

The suit has its genesis in the printing and distribution of a House Report, an investigative report of a Public School System. The case reached the Supreme Court on the procedural issue of the immunity of the officials under the Speech and Debate Clause of the Constitution and the judicially fashioned doctrine of official immunity. At the conclusion of the Supreme Court proceedings, the only defendant parties remaining were the Public Printer and the Superintendent of Documents, the Court having affirmed the judgment of the lower courts dismissing the suit as to the other defendants. Inasmuch as the Court dealt only with the issue of immunity and did not have facts before it regarding the extent of the publication and distribution of the Report, the case was remanded to the lower courts. The question remaining, therefore, was to determine if the publication and distribution of the Report were within the sphere of legitimate legislative activity so as to cover the Public Printer under the umbrella of the immunity of the Speech and Debate Clause of the Constitution.

Further proceedings in the District Court based upon affidavits of present officials of the Government Printing Office resulted in a dismissal of the action. The plaintiff appealed to the Circuit Court of Appeals where the matter is presently pending.

Another case arose out of a motion filed in October 1974, seeking to have a non-GPO employee seated on the Public Printer's Wage Advisory Committee which was to consist solely of GPO employees. The person had to be ejected from the meeting and the Government Printing Office building. He filed an action against the Public Printer and another official seeking \$50,000 compensation and \$500,000 in punitive damages. An answer was filed by the Government denying any improper action had occurred, and in January 1975 the case was dismissed for lack of prosecution.

In another case the plaintiff, a former employee, was suspended indefinitely by GPO in November 1973, pending disposition of criminal charges brought against her for murder, assault and battery in connection with a fellow employee. Plaintiff declared that she was improperly suspended and sought reinstatement in a complaint filed in February 1975 for declaratory judgment and other relief. The complaint was dismissed by the Court without prejudice.

Some other cases included five brought under Title VII of the Civil Rights Act, one of which was declared by the Court to be a class action. Two of these suits were decided in favor of the Government Printing Office and the remaining three are pending before the Court.

EQUAL
OPPORTUNITY
OFFICE

The Equal Opportunity (EO) Office is responsible for assisting the Public Printer in the implementation of a program designed to promote equal opportunity in employment and personnel practices within the Government Printing Office. The program is conducted in accordance with the Equal Employment Opportunity Act of 1972, and current Civil Service Commission rules and regulations published in the Federal Personnel Manual, Chapter 713.

The EO Office assists in the formulation and implementation of an affirmative action plan covering such elements as: skills utilization, upward mobility, training, supervisory and employee orientation, community involvement, program evaluation and processing of complaints from aggrieved employees or qualified applicants alleging discrimination on the basis of race, color, religion, sex, age, or national origin. In addition, the Office periodically advises the Public Printer on procedures, regulations and other matters pertaining to the EO program.

Production
Analysis

The EO Office provided pre-complaint counseling service and processed complaints of discrimination as follows:

	<u>FY 1975</u>	<u>FY 1974</u>	<u>FY 1973</u>
Number of Employees Counseled	357	453	674
Number of Formal Complaints Processed	22	14	10
Number of Informal Resolutions	80	53	130

In accordance with GPO Federal Merit Promotion Program procedures, the EO Office is represented on each promotion panel. During the past year, staff members served on 94 promotion panels and reviewed 209 promotion actions.

Personnel

Number of Employees

Central Office			
Full Time	14	11	8
Part Time	30	41	36
Field			
Part Time	<u>49</u>	<u>17</u>	<u>12</u>
Total	<u>93</u>	<u>69</u>	<u>56</u>

At the end of the year, the Equal Opportunity Office was Staffed by an EO Director, two EO Officers, a Spanish Program Coordinator, a Federal Women's Program Coordinator (FWPC), four EO specialists, two EO investigators, and two secretaries. The staff members in the field installations consisted of 14 counselors, three Field Service FWPC's and 32 EO Committee persons.

Significant
Achievements

New Spanish American hires increased the GPO total of Spanish American employment to 176 at June 30, 1975, an increase of 30.

The Director and key staff members conducted an orientation of top management in the concepts, principles, laws, and regulations pertaining to the agency's EO Program. In addition, a much broader EO Training Program entitled "EO Training for GPO Supervisors" was offered. This nine-hour course was conducted by staff persons and was presented to enable management to identify problem areas of particular EO concern, and to foster better relationships between employees and management in the work environment. The course stressed management's responsibility for EO results.

Future Plans

Greater use of statistical models and studies will be utilized by the EO Office to enhance the assessment of EO progress throughout the agency. Turnover studies and morale evaluations will be made. More frequent and timely reports regarding the findings will be made available to top management as well as Department and Service Heads.

SPECIAL
ASSISTANT

The Special Assistant to the Public Printer performs certain staff duties and is responsible for public information, and serves as the focal point of contact with industry and trade associations and private industry.

During fiscal year 1975, this Office:

- a. Made contact with and established good working relationship with trade and general press. Many positive articles have resulted.
- b. Assisted in the development of agency workshop programs designed to improve GPO/agency relations and effectiveness of Federal graphics.
- c. Coordinated a slide presentation on history, mission, organization, and scope of activities of GPO. Copies will be made for training and original was shown to the National Endowment for the Arts.

- d. Coordinated with Customer Service in developing programs to bring about better cooperation among agency editors, designers and printing officers.
- e. Served as liaison for visits by national and international printing officials.
- f. Compiled centralized speech file.
- g. Assisted in the development and execution of the first executive seminar outside the Central Office.

Future Plans

This Office plans to accelerate a number of external and internal public information programs.

Working with the Customer Service Manager, the Office will continue to present seminars and workshops to agencies and graphics-oriented organizations on how to get more out of the printing dollar.

OFFICE
OF
AUDITS

The Office of Audits is responsible for conducting independent and comprehensive audits of GPO operations, functions, and/or organizational units both in Washington, D.C. and at the various field locations: for performing such external audits, including contract audits, as are deemed necessary; and for reporting its findings and recommendations to the Public Printer. The Office of Audits maintains liaison with the General Accounting Office and other outside audit activities.

Activities

During the year, the Office of Audits reviewed cash handling procedures and controls; initiated a comprehensive examination of GPO pay policies and procedures; evaluated management and operating practices pertaining to: selected Field Printing Offices and Regional Printing Procurement Offices; Pueblo Distribution Center; billings submitted by selected commercial contractors; Documents Area order processing controls; Customer Deposit Accounts; and Agency complaints about printing. Follow-up reviews were performed on procedures related to handling of cash and other negotiable instruments; billing and collection procedures of the Government Accounts Section and batch controls system for processing customers' orders for publications. The staff members worked with representatives of the General Accounting Office (GAO) in its annual audit of GPO's financial statements.

During fiscal year 1975, the Office of Audits established a procedure to test turnaround times of orders submitted for publications; conducted three tests using this procedure, and reported on the results. Also, the staff verified GPO's change, coupon and imprest funds on a quarterly basis and responded to 22 special requests from top management. The staff also responded to three requests for staff assistance from Employee Relations Branch of Personnel Service and the Security Officer.

The Office of Audits worked closely with operating personnel and GAO to develop sampling plans which were used at fiscal year end to value GPO's inventories.

		<u>FY 1975</u>	<u>FY 1974</u>	<u>FY 1973</u>
	Audit Reports Issued	37	27	42
Personnel	Number of Employees	11	8	9
Significant Achievements	As a result of the audit work performed, procedures and controls were strengthened and improved. The Office of Audits made recommendations to GPO management which would increase revenue and/or reduce costs by a total of \$206,000. Included in this total are overpayments amounting to over \$40,000 that were recovered from printing and binding contractors. This represents an increase in cash recovery of \$7,500 over fiscal year 1974.			
Future Plans	The Office of Audits plans to establish a career development program for auditors by having them assigned to various work areas within the Government Printing Office for specified periods of time. The purpose of the program is to attract qualified people and train them to be competent managers.			

DEPUTY PUBLIC PRINTER (OPERATIONS)

The Deputy Public Printer performs such duties as are assigned by the Public Printer and acts as Public Printer in the absence of the Public Printer in accordance with Title 44 of the U.S. Code and other applicable laws. He is responsible for direction of planning and production of printing and binding through in-house facilities and contractors. In this capacity, he supervises and coordinates the activities of the Managers of the Customer Service, Printing Procurement, Production, and Quality Control and Technical Departments. The production statistics of these Departments are shown on pages 51 to 54 and certain data are summarized under each Department below.

Perspective	Fiscal year 1976 will see an increase in the amount of composition produced on photocomposition equipment and a continuing decrease in overtime hours in the hot-metal type-setting operations. The text processing capacity of the Electronic Photocomposition Division will more than double in fiscal year 1976 and new phototypesetting equipment will provide increased flexibility. New processes in the plate-making area will become operational which will soon replace our present relief platemaking processes. Purchased printing in the Regional Procurement Offices is anticipated to increase in volume in fiscal year 1976.
CUSTOMER SERVICE DEPARTMENT	The Customer Service Manager directs and coordinates the activities of the Planning Service, Plant Planning and Typography and Design Divisions. He serves as the Government Printing Office representative with the Joint Committee on Printing (printing and binding regulations). He advises the Public Printer and Deputy Public Printer on methods to improve GPO's ability to serve its customers.
PLANNING SERVICE DIVISION	The duties and responsibilities of this Division are serving as liaison between the Office and its customers in the Federal Government in connection with their printing and binding orders; receiving, reviewing, recording, preliminary planning and processing of orders; coordinating in the development of schedules for printing and binding services in cooperation with other Office personnel, maintaining informational and communication services related to work in process; picking up and delivering copy and proofs, and performing other related work.
Production Analysis	The total number of print orders and requisitions received in fiscal year 1975 decreased from 112,562 in fiscal year 1974 to 105,060 or about nine percent. The decreased number of orders and requisitions is attributed to the tightened economy

and increasing services furnished by the Regional Procurement Offices. However, this trend has leveled off now that the Federal Regional Printing Procurement Program has been fully established.

Significant Achievements The Congressional Information Section was reorganized which resulted in better response to Congressional needs and reduction in overtime.

PLANT PLANNING DIVISION The responsibilities of the Plant Planning Division are to: plan, estimate and prepare production schedules for plant production; prepare jackets covering requisitions for blank paper and miscellaneous supplies; and control inventories of paper and envelopes within the Office and printing contractors' plants.

Production Analysis The overall production decreased about 10 percent in fiscal year 1975 over fiscal year 1974. For example, jobs scheduled dropped from 30,218 to 28,440, firm estimates dropped from 11,962 to 9,088 and blank paper requisitions dropped from 6,841 to 5,905 (see detailed production statistics on page 51).

Significant Achievements Savings of over \$185,000 in the cost of printing resulted from recommendations by Division technicians. For example, the Civil Service Commission saved over \$39,000 through a suggested change in format; Housing and Urban Development accepted the suggestion to change a job from saddle stitch to paste-on-press which resulted in a \$25,000 savings; the Department of Army saved over \$30,000 by changing a job from sewn to adhesive binding; and the General Services Administration saved more than \$25,000 by changing a type of paper and method of packaging.

TYPOGRAPHY AND DESIGN DIVISION This Division is charged with the responsibility of providing design, illustration, consultation, and quality control services to all Government agencies and the Departments and Services of the Government Printing Office.

Production Analysis While some of the work in this Division continued to decline from previous years, such as the number of jackets processed (see page 51), orders for photoengraving and halftones and line cuts have increased from 9,935 in 1974 to 10,169 in 1975, a 10 percent increase.

Significant Achievements The Technical Review Section technicians were responsible for savings of nearly \$75,000 during the year, which does not include economies affected in conferences prior to completion of specifications and the preparation of finished artwork.

 The Interagency Training Program "Editorial Planning for Printing Production" was held as scheduled during the past fiscal year and 260 persons were enrolled in two sessions.

Sixty-five persons attended the first annual Government Printing Office "Design Focus" seminar for Federal artists and designers. This program included guest speakers of local and national stature from both private and federal sectors of the designed community.

PRINTING
PROCUREMENT
DEPARTMENT

The Printing Procurement Department is responsible for providing printing, binding, and related products and services required to be produced in field printing offices or procured from commercial sources. These functions are accomplished, under the direction of the Printing Procurement Manager, by coordination of the activities of the Commercial Printing Specifications, Central Office Printing Procurement, Regional Printing Procurement, and Field Printing Divisions.

Production
Analysis

The value of printing procured commercially during fiscal year 1975 when compared with fiscal year 1974 increased \$32.3 million (23 percent) in the Central Office and \$26.4 million (37 percent) in the Regional Offices. This was a total increase of \$58.7 million for the year which was primarily the result of the generally inflationary market of fiscal year 1975. The total number of jobs processed increased slightly (3.5 percent) from 181,364 in 1974 to 187,833 in 1975.

Significant
Achievements

A Multilith Press Model 4250 and Rotomatic 50-bin gathering machine were installed in the Commercial Printing Specifications Division to facilitate the preparation of commercial printing specifications. This has provided increased reproduction capacity at a lower cost and has virtually eliminated the hand gathering bottleneck that has plagued this operation for a number of years.

Computer terminals for abstracting and evaluating bids on print orders were installed in six more Regional Offices during fiscal year 1975. A total of nine Regional Offices now have this capability. It is estimated that 5,700 man-hours, or approximately \$47,000 will be saved annually as a result of this capability.

The conversion of the bid forms on the contract for marginally punched continuous forms to Optical Character Recognition (OCR) enabled the reduction of keypunching delays of as much as two weeks which had previously been encountered in processing the more than 200,000 individual bid items that were received.

A "single jacket concept" for term contracts was adopted. In the past, a separate jacket was assigned for each month of the contract term, but now only one jacket per fiscal year will be required. This has reduced errors and saved a considerable amount of processing time and storage.

Future Plans	A committee has been established for reviewing all term contracts for possible conversion to a basic format pricing structure. This concept will permit the automation of abstracting print orders on multiple award-type programs in both the Central and Regional Offices.
PRODUCTION DEPARTMENT	The Production Department is responsible for all "in-plant" printing production. This Department has direct responsibility for the Binding, Composing, Electronic Photocomposition, Letterpress, and Offset Divisions. The Delivery Section, Congressional Record Indexers, and Congressional Details also are the responsibility of the Production Manager. In addition, a Library of Congress Branch plant is operated in the Washington Navy Yard to produce catalog cards for the Library of Congress.
BINDING DIVISION	The mission of Binding Division is to perform binding and finishing operations on printed and blank sheets according to the requirements of Congress and other Federal agencies.
Production Analysis	<p>Production records for the past three fiscal years show an increase in most categories of Congressional work. For example, over 23,000 copies of legislative bills were processed, a 15 percent increase over last year. More than 1,500 hearings were processed, a 10 percent increase over last year, and over 12 million copies of the Federal Register were processed, a 13 percent increase over fiscal year 1974.</p> <p>The overall volume of work performed by the Division declined slightly during fiscal year 1975 due to the trend toward increased commercial procurement of work for executive agencies. The volume of work produced by the Binding Division is now primarily related to Congressional activity.</p>
Significant Achievements	During the past fiscal year the Binding Division's efforts were especially directed toward providing better service to Congress. Several new pieces of equipment were installed which will allow the Bindery to meet production requirements more efficiently and at a reduced cost. For example, two new faster folding machines were installed expediting deliveries of Congressional Bills. Also, two Nordson Hot-melt Applicators were installed on the mailing machines in the Record Room which resolved difficulties encountered in wrapping the Congressional Record and the Federal Register.
COMPOSING	The Division's responsibility is to accept manuscript material from Congress and Federal agencies, furnish galley and/or page proofs to the customer by "hot metal" process, correct returned proofs, and provide type or reproduction proofs to other Divisions in the advancement of a publication to delivery. As a service, the Division furnishes printing specialists to Congress and customer agencies, resolves printing problems of others, and provides guidance and technical advice upon request.

Production
Analysis

The Division consists of six sections--Monotype, Job, Linotype, Hand, Proof, and Patents. Each section operates on a two-shift basis and, when necessary, on a 24-hour basis to assure that the service expected of the Office is forthcoming. In addition, there is a small composing unit physically located in the Supreme Court Building where the opinions and decisions of the Justices are processed under security conditions.

The total number of ems set in fiscal year 1975 shows a decrease from 2.23 billion to 2.03 billion, a nine percent decline. The principal reason for the decline is due to certain patent work and other tabular matter being procured commercially and/or produced by photocomposition within GPO. The trend from hot-metal typesetting toward photocomposition and other methods of reproduction is expected to continue.

The largest single issue of the Congressional Record was produced this year which consisted of 608 pages and was printed in two parts. Also, the largest issue of the Federal Register was printed this year. It consisted of 960 pages and was printed in two parts and three sections. The Federal Register continued its trend of larger daily issues in fiscal year 1975 with a 17 percent increase in printed pages. Compared with last year, the Register had six more issues and 7,004 more pages, with an average pages per issue increase of 24, or 168 pages per average issue. The Register has now grown 60 percent over the 1970 page total of 17,709. The Congressional Record and Federal Register pages for fiscal year 1975 as compared with preceding years follow:

	<u>FY 1975</u>		<u>FY 1974</u>		<u>FY 1973</u>	
	<u>Issues</u>	<u>Pages</u>	<u>Issues</u>	<u>Pages</u>	<u>Issues</u>	<u>Pages</u>
Congressional						
Record	197	44,014	202	45,195	176	38,534
Record Index	20	2,738	23	2,685	19	2,299
Fed. Reg.	259	43,525	253	36,521	252	29,596
Fed. Reg. Index	14	639	12	600	14	664

ELECTRONIC
PHOTO-
COMPOSITION
DIVISION

The Electronic Photocomposition Division produces photocomposition on manually-operated photomechanical and tape-operated phototypesetting machines. An Optical Character Recognition System (OCR) and a Text Editing Processor are used for capturing original typed manuscript copy and performing file corrections and updating. The Division provides information and consulting services to customer agencies to enable them to adapt their composition needs to these systems.

Production
Analysis

The Linotron production of 708,034 pages in fiscal year 1975 represents the highest production achieved on the system since installation in 1967. This is an increase of 102,147 pages, 17 percent, over the number of pages produced during fiscal year 1974.

Significant Achievements	<p>Congressional Hearings have been by far the largest volume of work produced through the OCR/Text Editing System. Approximately 14,500 manuscript folios were processed by this new system during the latter part of fiscal year 1975 compared with none in fiscal year 1974. The majority of these folios were for the Senate Appropriations Committee which submitted OCR scannable ready copy to GPO.</p> <p>During fiscal year 1975, the highest total production through the Linotron System was Patent Specifications which totaled 396,032 pages this fiscal year compared with 337,854 pages last fiscal year.</p> <p>The Official Gazette pages totaled 19,722 this year as compared with 16,385 pages for fiscal year 1974. This reflects a 17 percent increase for the Patent Specifications and a 20 percent increase for the Official Gazette.</p> <p>Specifications were developed and bids submitted for a new high-speed mathematical photocomposing system with supporting software. The new system will replace the current Linofilm System and Fotosetter equipment and will expand the typesetting flexibility of the Division.</p>
LETTERPRESS DIVISION	<p>The primary mission of the Letterpress Division is concerned with Congressional requirements for printing produced by the letterpress method. This task is accomplished by two press sections: Main Press and Postal Card, and three Plate Sections: Photoengraving, Stereotype, and Electrotype.</p>
Production Analysis	<p>Total press impressions increased slightly, (two percent) from 393.2 million in 1974 to 402.5 million in 1975, due to a large number of issues of the Federal Register. The increase was achieved even though there was a 36 percent decrease in the number of postal card impressions.</p> <p>In addition to normal production, the postal card presses produced, for the first time in fiscal year 1975, a total of 20.9 million kraft wrappers.</p>
Significant Achievements	<p>The casing machine acquired for production of small cartons in the Postal Card Section has proven to be a vital improvement in casing of postal cards and has resulted in a decrease of about 5,000 man-hours per year in this operation.</p> <p>A joint effort between the Letterpress and Offset Divisions for use of photopolymer plates is proving advantageous. Photopolymer plates are being used to produce passports and plans are being formulated to purchase a suitable photopolymer platemaking system for utilizing these plates in the Letterpress Division which should result in reduced platemaking costs.</p>

<p>OFFSET DIVISION</p>	<p>The Offset Division is responsible for the production of printed matter by the use of rotary sheetfed and web offset presses. The Division performs preparatory tasks according to specifications for work to be procured from commercial sources. It inspects and stores lithographic reproducibles manufactured in the plant or commercially.</p>
<p>Production Analysis</p>	<p>The number of press impressions produced by this Division declined from 283.7 million in fiscal year 1974 to 269.6 million in fiscal year 1975, a five percent decrease. This continued decline reflects a trend toward increased procurement from commercial sources.</p>
<p>Significant Achievements</p>	<p>Successful conversion of United States Passport printing from the letterpress process to a combination of dry and wet offset printing was accomplished. A better quality of passport printing has resulted.</p> <p>Procurement and installation of six 19" x 25" Harris Group 83 presses with Dahlgren Dampening Systems was completed. These presses replaced six obsolete presses which required continuing expensive repairs to remain operational. The new press design and improved quality capability will result in better printed products at reduced costs.</p>
<p>QUALITY CONTROL AND TECHNICAL DEPARTMENT</p>	<p>The Quality Control and Technical Department is responsible for the laboratory testing of paper, inks, bookbinding materials, metals, chemicals, and miscellaneous supplies, and the manufacture of select supply items. The Department makes cost reduction studies and conducts the necessary developmental work to improve quality, effect economies, and resolve problems that arise in the Customer Service, Production, and Printing Procurement Departments. Technical support is provided to the various quality control elements in the Office through the Quality Control Division. Technical support and service is also provided to the Joint Committee on Printing and customer agencies.</p>
<p>Production Analysis</p>	<p>The total number of material samples tested during the year amounted to 11,814. This number represents a sizable decrease of 21 percent from last year's total. The decrease is the result of a policy decision made in January 1975 to limit testing to those items bought on specification and to eliminate testing of brand name items. The objective was to provide additional time for work on cost reduction studies and product improvement.</p>
<p>Significant Achievements</p>	<p>The Composing Division, through joint effort with this Department realized a reduction of 61 percent in GPO's consumption of tinantimony alloy, an expensive type metal correction material. This reduction will result in savings in excess of \$100,000 annually.</p>

The linotype metal inventory was identified as being excessively high for present production needs and 400,000 pounds of this metal were sold and an additional 100,000 pounds were offered as partial payment for 100,000 pounds of monotype metal.

ASSISTANT PUBLIC PRINTER (MANAGEMENT AND ADMINISTRATION)

It is the responsibility of the Assistant Public Printer for Management and Administration (M&A) to provide the support services essential to ensure effective functioning of all operating Departments of the Office. The Assistant Public Printer (M&A) supervises the Comptroller and the Directors of Data Systems, Engineering, General Services, Materials Management, Personnel and Security; coordinates their operations; and advises the Public Printer on policy matters. Statistics applicable to these Services are shown on pages 55 and 56 and certain data are summarized under each Service.

Perspective

Fiscal year 1976 will see further implementation and synchronization of the Annual Operating Plan whereby the various GPO Management Programs are appropriately integrated to more effectively utilize and control GPO resources. Work measurement units and standards will be further refined and will be used in justifying manpower needs to accomplish anticipated workloads. The budget request by each manager, based on work measurement units and standards, will be closely coordinated with our "Management by Objectives" program, so that realistic goals can be defined and implemented. Several major automation projects are to be further refined and updated, and data automation services extended to utilize the full capabilities of the IBM 370/145 system to be obtained in fiscal year 1976.

DATA SYSTEMS SERVICE

The Data Systems Service is responsible for providing GPO with computerized data processing services and regular reports on a timely basis. It also provides technical advice and initiates the development of systems and programs which will effectively meet office-wide managerial and operating requirements.

Significant Achievements

During fiscal year 1975 the Service completed 20 computer systems surveys, and was working on 59 others. More than 300 new computer programs were implemented or were in process, and 296 programs were revised or in the process of revision.

More efficient equipment occupying less space was installed; modifications to the existing IBM/360 system provided better capability at reduced rental costs.

The automation of the monthly Foreman's Reporting System was completed and implemented. It now requires 2.75 hours of computer time to complete an operation which previously required 216 hours of electronic accounting machine time plus 33 hours of computer time. Reports are now being developed and issued more timely.

The first phase of work-in-process inventory automation has been completed and the report time has been reduced from 20 to 10 workdays with associated cost savings.

More timely reporting has resulted from the automation of the unit cost books maintained by the Financial Management Service.

The Leave Reporting system has been improved with savings resulting in computer processing time, elimination of a file of over 4,000 punched tabulating cards, and the elimination of about 17,000 printed pages produced annually. An estimated 25 percent of computer processing time is being saved, and one 300 page biweekly report has been eliminated due to the improvement of payroll programs.

Production of the index portion of the Documents Area Monthly Catalog by means of computer aided photocomposition (Linotron) was initiated. This process has reduced production lead time.

The computer systems were converted to OS/360 in-house in three months instead of six to twelve months estimated by contractor. Consequently, service was improved in the operation much quicker than estimated.

Future Plans

The future plan is to commit systems design and computer personnel to the priorities established by the Automated Data Services Steering Committee. These include replacement where justified of installed operating systems by more efficient operating systems, implementation of the Publications Receipt and Control System (PRCS), automation of the composition of the Federal Register Program, conversion to standard programming languages, the development of formal operating standards and procedures for system and program development, and the improvement of systems documentation.

ENGINEERING SERVICE

The Engineering Service is responsible for the management and maintenance of all GPO facilities, machinery, and equipment in consonance with an effective and safe working environment for employees. It provides professional engineering assistance when required for studies, planning, systems development, and purchase proposals. The Service is composed of Engineering, Industrial Systems, and Buildings Divisions and has 490 full time employees.

Significant Achievements

Under supervision of the Engineering Service, contract construction on Phase II of the GPO's \$13 million two phase air conditioning project is 70 percent complete and progressing satisfactorily. The refurbishing for use by other GPO services of space vacated by Superintendent of Documents is proceeding satisfactorily. During the year, the Engineering Service installed over 40 major items of equipment throughout the GPO, including six offset presses, eight casting machines and two carton sealers. Two large screw type air compressors were installed in the power plant to meet GPO compressed air requirements.

The Engineering Service prepared specifications for, installed, tested, and turned over to production personnel the OCR/Text Editing System. A TV security system was installed in the mail room and guard office. The Engineering Service developed a plant layout for GPO's Laurel II facility and designed a materials handling system for the Order Processing Division. It developed a plant layout for enlarging Electronic Photocomposition operations.

The Engineering Service contributed to preparation of an Environmental Impact Statement regarding the GPO's proposed relocation.

During the year, the Service was able to achieve a reduction of more than three million kilowatt hours in electric power consumption and equally significant reductions of gas, steam, and water consumption as a result of its effective implementation of the Energy Conservation Program.

Future Plans

It is anticipated that the demand for engineering planning services will continue at a high level. As the air conditioning project nears completion, attention can be turned to planning and updating of a number of drawings and specifications for deferred projects.

FINANCIAL MANAGEMENT SERVICE

The Financial Management Service provides financial management and productivity and work measurement services to meet office-wide managerial and operating requirements. These services are accomplished through an Accounting Systems and Procedures Staff and seven division heads who report to the Comptroller. Divisions are established for Budget, Cost and Property, Examination and Certification, General Accounting, Production Billing, Productivity and Work Measurement, and Rates and Investigations. These Divisions oversee the effective employment of financial resources according to plan and ensure that Government Printing Office printing and binding operations obtain revenues with which to meet expenses, and that all GPO programs are administered within the appropriate resource limitations.

Significant Achievements

In accordance with office-wide emphasis of planning, control, and productivity, a system of budget call estimates was initiated by sub-object class and provided to all Departments and Services for guidance in preparing their respective budget estimates. The estimates are supported by the Budget Division's monthly analysis of budgeted costs compared with actual costs and include an objective of relating the funds requested by each cost center to its projected manpower requirements - which in turn are based on work measurement units. In addition to objectives which have been formally set up for inclusion in the MBO Program, estimates are to

be added for each functional area in terms of the immediate objectives whose attainment is planned during a particular fiscal year period. Budgeting, productivity and work measurement, and management by objectives are thus inter-related in the planning process.

The Central Office work-in-process inventory was converted from punched cards to disc files. New procedures developing out of the automated file system have made possible inventory transfers out of work-in-process which correspond to physical reality, and made it possible to send out billings for finished work in a more timely manner.

The high volume operation of accounting for bills of lading has also been automated and placed on a current basis. Automation of the recording of essential pricing data in unit cost books was accomplished, eliminating the manual posting of data to worksheets. Billing time for printing and binding work was, on the average, reduced by 30 percent during fiscal year 1975.

Disbursements as well as billings were expedited. To verify GPO expenses for contract printing, freight, paper and materials, and other items, fifty voucher examiners processed over one quarter million vouchers for payment. Eighty percent of the vouchers presented for payment were processed within 10 days following receipt.

Future Plans

The GPO and Field Service Scale of Prices will be revised and updated to assure adequate recovery of costs. An expansion of the Budget Program with improvement in budgetary procedures is anticipated. In accordance with continued emphasis on our participation in the Federal Productivity Program, productivity and work measurement standards will be developed for additional areas of the Office. The Property Management Program will be improved by development of additional physical inventory procedures for paper and publications for sale. Plans are also being implemented to revise the capitalized equipment reports.

Automation of financial systems, which has been designated a priority undertaking by the ADP Steering Committee, will be implemented in fiscal year 1976. A review and analysis of all Financial Management Service operations will be continued in an effort to improve paperwork flow and methods and develop systems which will provide more accurate and timely financial data.

GENERAL SERVICES

General Services provides a comprehensive range of general and administrative services, management and systems analyses, and a responsive management information system in support of office-wide managerial and operating requirements. These services are achieved through the administration of the

following major activities: (1) paperwork management and word processing, (2) telecommunications and space management programs, (3) management and systems analyses, (4) management information program, and (5) administrative services, including but not limited to: parking, subscription control, conference room schedules, general files, and administrative postage.

**Significant
Achievements**

During fiscal year 1975, General Services issued 166 GPO Directives and processed 929 requisitions for the production of GPO forms and other internal printing. General Services supervised the destruction of 1,050 cubic feet of records and the transfer of 642 cubic feet of GPO records to the Federal Records Center at St. Louis. It also, supervised the GPO pay parking program during its first full year of operation, and issued over 1,600 permits for the seven GPO parking lots.

Under the telecommunications program, more than 20,000 teletype messages were sent and over 4,000 incoming messages were received. Final measures were taken to implement the installation of a new GSA Centrex telephone system, including a modern automatic call distributor.

In the paperwork management area a new GPO Forms Management Program was implemented. A revised version of the GPO Directives System modified the level of approval for certain policy directives and effectively reduced the flow of routine papers to the Office of the Public Printer. Various types of word processing equipment were evaluated in an operational environment in accordance with the provisions of a new directive implementing the Word Processing Program. Measures were taken to improve managerial control over purchases of property and services by revising required approval levels necessary to initiate purchase orders.

Management analysis activities extended into a comprehensive study of GPO receiving and shipping facilities, with the resulting recommendations accepted, but not fully implemented at the end of the year. An analysis of GPO administrative postage charges for fiscal year 1975 resulted in payments to the Postal Service being reduced from \$498,000 to \$273,190, a savings of \$224,810.

Future Plans

Broader participation in the paperwork management area is anticipated. Areas which are to receive attention include the revision of record retention schedules, the central files area, correspondence control, and word processing. An important planning project is the telecommunications system required for the proposed new GPO building. The Space Management program will continue to require major effort in planning the utilization of areas in the Central Office which have been vacated by Documents functions moving to other locations.

MATERIALS MANAGEMENT SERVICE	The Materials Management Service is responsible for the acquisition of equipment; materials and supplies; commercial services; transportation services; receiving and shipping; maintaining stores inventories and current inventory records of paper, envelopes, materials and supplies; initiating and accounting for the shipment of government post cards; and providing authorized support to Government Printing Office operations and customer agencies.
Significant Achievements	<p>More than 10,000 purchase orders were issued during fiscal year 1975. The dollar value of procurement activities during the year amounted to \$60.7 million, which represents a decrease of \$32.9 million compared with the previous fiscal year, a decline of 37 percent. A major cause of this decline is a 40 percent decrease in expenditures for blank paper and envelopes and a 37 percent decline in pounds of paper purchased. Fiscal year 1974 corresponded to a period of paper shortage in the United States. It was a period of high price and low availability, with the result that Federal agencies and contractors turned to the GPO as the only available source of supply. By fiscal year 1975, conditions had eased and there was, for example, a 15 percent decline in the value of paper furnished contractors. A relatively small increase of 12 percent in materials and supplies expenditures during fiscal year 1975 is attributable to normal inflationary trends and a five percent increase in the number of purchase requests processed. A reduction of \$6.1 million in services, transportation, communications, and travel as compared with fiscal year 1974 is the result of a \$8.5 million decrease in postal charges, offset by a \$2.4 million increase in the cost of GSA space rentals.</p> <p>The Traffic Division negotiated reduced freight rates with various shippers as authorized under Section 22 of the Interstate Commerce Commission Act, resulting in a savings to the Government Printing Office of approximately \$718,110.</p>
Future Plans	The Materials Management Service will continue its performance of purchasing and contracting activities so as to obtain promptly and on the best possible terms the goods and services necessary to perform GPO activities. It will be working together with the Financial Management Service to improve inventory procedures in order to ensure effective control and the optimum use of resources.
PERSONNEL SERVICE	Personnel Service is responsible for advising the Public Printer and his staff on personnel policies and personnel programs which will enable the Office to carry out its mission in the most effective manner. It is also responsible for administering personnel programs in accordance with pertinent laws, civil service rules and regulations, and policies of the Public Printer.

Significant
Achievements

A training program was developed and implemented for printing specialist trainees, entering at the GG-5 level.

The first executive retreat for top GPO officials was planned and conducted in the fall of 1974. The 2 1/2 day conference, which was held at the Belmont Center in Maryland, provided a group process workshop designed to develop team-building techniques among executive level managers.

A Drug Abuse Program was established with publication of a GPO Instruction on the subject, dated November 13, 1974. This rehabilitation program, along with the Alcoholism Program is conducted in the Occupational Health Division by staff advisors under the supervision of the Medical Officer.

The Employment Branch was reorganized into two areas of functional responsibility - the Staffing Section and the Special Programs and Employee Assistance Section. This action will permit more efficient use of resources and eliminate the need for the Assistant Chief, Employment Branch.

The Position Management Branch identified and described 24 "bridge jobs" to implement the new Upward Mobility Program of the Government Printing Office. These jobs serve as "bridges" to positions having higher level duties.

The number of employees availing themselves of the services of the personnel counselor increased by approximately 50 percent. The advice offered was expanded to include such areas as medicare, housing, and veterans affairs.

Future Plans

In the area of supervisory training, the Career Development Branch is currently in the process of formalizing the on-the-job training phase of the Supervisory Development course (GPO-1) and revising the Management Development course (GPO-2). The Supervisory Safety Program will be implemented for approximately 500 supervisors.

As part of the Office's Upward Mobility Program, the hiring and training of at least 25 unskilled worker-trainees to be qualified clerk-typists is anticipated.

With over 95 percent of GPO employees represented by labor organizations, the Labor-Management program has become increasingly significant. It is anticipated that GPO Instruction 630.1A, Labor Management Relations in the Government Printing Office, will soon be revised to reflect the greatly expanded scope of bargaining in the Federal Service resulting from the amendment of Executive Order 11491.

SECURITY SERVICE	The Security Service provides a program of security for Government Printing Office personnel and plant facilities, including law enforcement, investigative and protective services in support of office-wide managerial requirements and policies.
Significant Achievements	<p>At the beginning of the fiscal year, the number of assaults on GPO employees in close proximity to GPO Central Office increased and caused considerable concern for the safety of GPO employees. To deal with the problem, special police patrols were established for the areas immediately adjacent to Central Office facilities. As a result of the intense patrolling and increased police visibility, no further assaults or robberies of GPO employees have been reported from approximately early August 1974, when the outside patrolling was instituted.</p> <p>As a result of closing a non-essential employee entrance, five protective service personnel were reassigned to provide security coverage for newly acquired leased office and warehouse space. Two other posts were determined non-essential and discontinued, releasing three men for other duties. These realignments of protective coverage saved approximately \$96,000 annually.</p> <p>In order to increase the efficiency and capabilities of our protective service force, a program was established to provide formalized professional training to a selected number of personnel at the Federal Law Enforcement Training Center, Department of the Treasury. Twenty-seven special policemen and nine supervisory policemen were trained during fiscal year 1975.</p>
Future Plans	Manpower utilization will be scrutinized to eliminate unnecessary tasks and insure that personnel are utilized in the most efficient and productive manner. Efforts will continue to develop and maintain a highly efficient and professional security force.

ASSISTANT PUBLIC PRINTER (SUPERINTENDENT OF DOCUMENTS)

The major responsibilities of the Office of the Assistant Public Printer (Superintendent of Documents) are the sale of government publications, the compilation of catalogs and indexes of government publications, the distribution of government publications to depository libraries, and the mailing of publications for Members of Congress and Government agencies. The Office fulfills these responsibilities through the Documents Sales Service, the Documents Support Service, and the Library and Statutory Distribution Service. Statistics applicable to these Services are shown on page 57 and certain data are commented on below.

The Superintendent of Documents receives approximately two and one-half million letters of inquiry and four and one-half million sales orders annually. In addition, more than one-half million customers are served by twenty five government bookstores. During fiscal year 1975, 131 million publications were distributed, including 38.2 million publications distributed at the expense of other Government agencies, and 11.8 million publications distributed to 1,170 depository libraries. During the year over 43,000 documents were cataloged, and mailing lists containing 3.2 million addresses were maintained. Total sales to the public amounted to \$34.5 million of which \$4 million were derived from bookstore sales.

Perspective

Increases in sales and in the requirements of the Depository Library Program are expected to be moderate in terms of volume; emphasis will be placed on achieving a significant improvement in the quality of operations. A major objective of the Superintendent of Documents will continue to be the increased use of modern data processing technology in order to reduce order processing time and to perform all of the necessary cataloging, sales, and distribution functions with greater efficiency.

PUBLICATIONS RECEIPT AND CONTROL SYSTEM (PRCS)

PRCS, an on-line, interactive data base, ADP teleprocessing system, designed to automate the warehouse inventory control of the approximate 25,000 titles of bulk warehoused publications became operational on December 23, 1974. The total system is comprised of 17 transactions program modules. It tracks bulk publications from the time a printing order is initiated through the warehouse receiving, locating, and subsequent shipping to users. There are 192 data elements available in the data base for use by 20 workstation terminals. The daily transactions processed through these workstations are being accumulated and manipulated to produce 11 different daily management information batch reports and 9 weekly summary reports. Some adjustment and modifications will be required for perhaps the first year of operations.

DOCUMENTS
SALES SERVICE

The Documents Sales Service is responsible for the availability and sales to the public of government documents. It requisitions sales copies; maintains inventory records; warehouses publications; receives mail and telephone orders; processes orders; answers inquiries; handles complaints and adjustments; and picks, packs, labels, and mails sales copies to customers. It operates six bookstores in the Washington, D.C. metropolitan area, and 19 bookstores in other cities. It also distributes selected documents through two distribution centers.

Significant
Achievements

Planning and development began on a direct, on-line subscription fulfillment system in the Order Division. This 30 month project has the highest priority under the data automation plan for Documents. A project group comprised of personnel from Documents and Data Systems Service was established to carry out the project. With the exception of a limited number of essential modifications, the current system will be frozen, pending implementation of the new subscription fulfillment system. The new system is scheduled to be operational by December 1977.

Investigation began in March 1975 into methods and types of hardware and software that might be used in implementing the first phase of an automated system for processing and controlling retail orders for publications. The initial objective is to centralize reference data input and establish a single, on-line file for Order Division personnel to use for reference and to produce picking tickets. Further steps will be continued during the next fiscal year as part of the data automation plan. Efforts to purify the existing microfiche publications reference file (PRF) were ongoing throughout the year, and significant improvement was made.

The reduction of our mailing list for "Selected U.S. Government Publications" commenced. When completed, it is anticipated that this reduction program will reduce the cost of printing and mailing "Selected U.S. Government Publications" more than \$400,000 per year.

DOCUMENTS
SUPPORT
SERVICE

The Documents Support Service is comprised of three divisions which are responsible for directing work-supporting and management services. The Administrative Division is charged with correspondence control, personnel program administration in liaison with Personnel Service and clerical and mailing supply management. The primary functions of the Analysis and Review Division are the analyses, development, review and recommendation of changes to present policies, programs, and procedures. The Receipts and Accounts Division is responsible for mail receipt and distribution; receipt, deposit and refund of customer remittances for sales publications; and maintenance of special accounts.

Significant
Achievements

The Daily Status Report was expanded to include 115 different operations being tracked daily in the system. A high of 510 productive man-days of effort has been recorded. Important features added during the year include man-days of direct effort applied, the daily computation of units processed per man-day, the daily computation of a ninety-day moving average of production per man-day for most operations, and a daily computation of the percentage of average work produced.

Productivity became more closely scrutinized by GPO top management as backlogs mounted. After five months of analysis by Support Service personnel and adoption of new procedures in the Receipts Branch, productivity increased 18.5 percent in opening and certifying new incoming mail. This improvement contributed to the reduction of the average daily backlog from 35,190 for the month of January 1975 to 10,000 for June 1975.

During May 1975, the development of a new pricing concept was undertaken to revise the scale of prices for publications sold to the public that will allow for pricing more closely associated with costs. This is in line with comments made in the GAO report dated November 19, 1974, entitled "Pricing of Publications Sold to the Public." The objective of implementing the revised pricing scale is to assure the recovery of all General Sales Program costs and to return the Sales Program to a self-sustaining basis. Implementation is anticipated for January 1976.

Deposit accounts recordkeeping has been computerized. Statements were prepared by computer and in the mail by the 10th workday of the month. An aggressive campaign was begun to purge the files of accounts which had been inactive for three years or longer. Microfilm of the deposit account statements is being prepared by Computer Operations Division as a by-product of the statement preparation.

LIBRARY AND
STATUTORY
DISTRIBUTION
SERVICE

This Service is responsible for compilation of catalogs and indexes of government documents, distribution of government documents to depository libraries and mailing of documents for Members of Congress and Government agencies in accordance with Titles 1 and 44 of the United States Code. In fiscal year 1975, over 43,000 documents were cataloged and indexed. Eighteen new depository libraries were designated bringing the total number to 1,170. The number of publications distributed to these libraries increased by 11 percent compared to fiscal year 1974, from 10.6 million to 11.8 million. The number of statutory distributions was reduced by 26 percent, from 51.9 million publications to 38.2 million. There has been a 40 percent reduction in such distributions over the two-year period since fiscal year 1973, when the number of publications distributed was 64 million.

Significant
Achievements

The reorganization and relocation of the Service has resulted in the acceleration of depository distribution through installation of better handling equipment, adequacy of space and increased personnel. This is borne out by the tripling of production during the last six months of the year over the first six months.

STATISTICAL APPENDIX

U.S. GOVERNMENT PRINTING OFFICE
STATEMENT OF ASSETS, LIABILITIES AND INVESTMENTS
AS OF JUNE 30, 1975
(DOLLARS IN THOUSANDS)

FOOTNOTES TO FINANCIAL STATEMENTS

- 1/ Other funds consist of account balances of the Congressional Printing and Binding Appropriation, Office of the Superintendent of Documents Salaries and Expenses Appropriation, Site Acquisition Appropriation, and the value of building structures and land which is specifically excluded from the Government Printing Office Revolving Fund by law (44 U.S.C. 309). Other funds do not include \$300 thousand appropriation for environmental impact study which was transferred to GSA.
- 2/ Accounts Receivable Government is net of \$188 thousand allowance for doubtful accounts established during fiscal year 1975.
- 3/ Publications for sale inventory is net of \$2,620 thousand, allowance for unsalable publications, and is computed using the retail inventory pricing method. Printing work-in-process represents in-plant work at standard value. Paper, envelopes and other supplies are composed of \$10,858 thousand for paper and envelopes using the first-in, first-out (FIFO) method of valuation and \$3,795 thousand for materials and supplies computed on a moving average basis.
- 4/ Accounts Payable does not include a contingent liability of \$19,686 thousand for the net value of sick leave earned and accumulated by employees of the Government Printing Office.
- 5/ Printing and Binding services performed for Government Agencies and Congress include intra-office sales of \$17,184 thousand and related profit for Printing and Binding work performed for the Superintendent of Documents Sales Program.
- 6/ Other funds represent \$4.6 million for the acquisition of a new site for the Government Printing Office, the book value of \$1,948 thousand for Government Printing Office buildings, the Superintendent of Documents' furniture, machinery and equipment with a book value of \$990 thousand less the Superintendent of Documents' accrued annual leave for employees of \$533 thousand.
- 7/ Unliquidated obligations and estimates to complete open commitments as of June 30, 1975, include \$23.4 million which has been authorized by Congress to be paid from appropriations for subsequent fiscal years.

SIGNIFICANT ACCOUNTING POLICIES

Assets, liabilities, revenue, and expenses are recognized on the accrual basis of accounting except for Sales of Publications Operations revenue from subscription sales which is on the cash basis for one year subscriptions.

Land, buildings and equipment are stated at cost. Major improvements and betterments to existing plant and equipment are capitalized. Expenditures for maintenance and repairs which do not extend the life of the applicable assets are charged to expense as incurred.

Depreciation of the plant equipment and machinery is provided on a basis estimated by the Government Printing Office to be sufficient to write off the cost of the assets over their useful lives, using the straight-line method.

When properties are retired or otherwise disposed of, the asset and accumulated depreciation accounts are adjusted accordingly. Any resulting profit or loss is charged or credited to earnings.

Revenue generated by the Printing and Binding Operations is recognized when entered into work-in-process.

Revenue generated by the Sales of Publications Operations is recognized when non-subscription publications have been shipped or when services have been performed; revenue from one year subscriptions is recognized when the funds are received or customers are billed.

Reserved retained earnings represent funds for future acquisitions of machinery and equipment.

Publications for sale inventory is computed using the retail inventory pricing method; printing work-in-process is recorded at standard value; paper inventory is recorded at a standard cost using the first-in, first-out (FIFO) method of valuation; and the materials and supplies inventory is computed on a moving average basis.
